FRONTEND DEVELOPER

Web Development | Software Development

Over 1 year of experience developing websites and real-world projects. A self-taught individual with the ability to face new challenges, cooperate and contribute ideas within a team, and a strong interest in learning technologies that enhance the experience of customers and users.

PROJECTS

React web application – Game Hub

- Video game discovery web application that allows users to search for games by name, platform, genre, and more. Click on a game's title to see more details.
- Built with a pragmatic approach: Make it work, refactor, improve implementation.
- Increased code readability by refactoring and applying OOP principles, separation of concerns, and clean code practices.
- Improved user experience and app performance by learning and using React Query and Zustand for state management.

Live demo: game-hub-eta-lilac.vercel.app · Code: github.com/GerardoGarcia79/game-hub

React web application – E-commerce storefront

- Online store web application that fetches a list of products, allows users to add or remove products from the cart, and view the list of selected products with the total price.
- Increased readability and maintainability by using React Reducer and React Context to share state globally.
- Improved performance and accelerated development by using Tailwind CSS.
