FRONTEND DEVELOPER

Web Development | Software Development

Over one year of experience in developing and maintaining user-friendly websites and real-world projects. Self-driven with strong problem-solving, attention-to-detail and time management skills, adept at collaborating and contributing innovative ideas within remote teams. Highly motivated to continuously learn and adapt to emerging technologies.

PROJECTS

Next.js Full-stack application – Issue Tracker

- A full-stack app with a modern design for efficient issue tracking. It features a dashboard with issue summaries, charts, and counts, robust issue management (create, update, delete, assign).
- Advanced features like pagination, sorting, and filtering.
- Secure authentication and role-based access control ensure data protection.

Live demo: issue-tracker-eight-henna.vercel.app · Code: github.com/GerardoGarcia79/issue-tracker

React web application – Game Hub

- Video game discovery app enabling users to search and filter games by name, platform, and genre, with detailed views for each title.
- Enhanced code readability and maintainability through Object-Oriented Programming (OOP) principles, separation of concerns, and clean code practices.
- Optimized performance and user experience by integrating React Query and Zustand for state management.
